

3. File 4  
NOV 7 1953

Figure 1 shows a schematic diagram of a 1D lattice chain. The chain is represented by two parallel rows of circles. The top row contains circles labeled 'A' and the bottom row contains circles labeled 'B'. The circles are connected by horizontal lines, representing nearest-neighbor interactions. The chain is labeled '1D Lattice Chain' at the bottom.

Gentlemen:

Reference is made to Contract No. RS-4801.

The contractor will be reimbursed for employees' travel at a rate of \$15 per day which is split - \$9 for room; \$6 for meals. Should the room charge exceed \$9 per day and documented evidence is attached to the travel voucher, the contracting officer will reimburse the contractor for the balance.

The contractor will in addition use government regulations regarding the splitting of days.

Very truly yours,

1. *Phragmites australis* (Cav.) Trin. ex Steud.

**Contracting Officer**
